Three ways to teach you the right toy!

儿童玩具的选择非常重要。不同年龄的孩子需要不同类型的玩具。年幼的孩子只能分辨一些简单的颜色和形状。年龄较大的婴儿喜欢咬人，然后抓挠。对于这样的宝宝，我们需要为他选择一些柔软安全的玩具。当他还是个孩子的时候，他需要培养自己的创造力。您可以选择益智玩具！

The selection of children's toys is very important. Children of different ages need different types of toys. Young children can only distinguish some simple colors and shapes. Older babies like to bite and then scratch. For such babies, we need Choose some soft and safe toys for him. When he is a child, he needs to cultivate his creativity. You can choose educational toys!

1.Security

Safety is the first thing that parents need to consider when choosing any item for their children, especially toy children who have been playing with their hands, and need more careful attention. The safety is divided into two negative aspects. On the one hand, it is chemical safety. You should pay attention to the material description of the toy, whether the material is suitable for children to play, smell the odor. If the odor is strong, it proves that there are too many chemical additives, which cannot be selected. This depends mainly on Parents observe and judge.

On the other hand, it is physical safety. Touch to see if the toy has smooth edges and no burrs, and if there are sharp objects. Also check whether the toy is firm and whether small objects such as small screws may fall off to avoid harming the baby.

Functionality

In the development process of children at each stage of growth, their intelligence and hands-on ability are different, and toys with corresponding functions should be selected according to the characteristics of the child's development stage. For example, a baby can choose a toy with sound in the infant stage to promote the baby's hearing development.

During the period of teething, you can choose teether toys, and when you can communicate, you can choose toys such as story machines. Bigger can pick up educational toys for children and develop children's intelligence.

3. Age-appropriate

Another important point when choosing toys is age-appropriateness. Do not choose toys for children over the age stage, because children who are too young will not be able to understand how to play with toys when they face overage toys, causing them to lose their toys. In addition to its own meaning, there are certain dangers for children with over-age toys. It does not play a role in the ability of the toy to the child, but also has adverse factors to the child.

The selection of toys should focus on safety and age-appropriateness. These two points are more important. Then we can choose the type of toys they like according to their interests. The quality of toys is based on health!

Early education toys, better help babies learn during play

Teach toys early to help babies learn how to read during play:

Little babies at the age of 2 ~ 7 are in the stage of not knowing anything. They need to be carefully guided by adults when they are exploring the world. The book knowledge is too early for them, and they do not understand it at all. The emergence of early education toys It has helped countless babies to learn during play. Many parents want to buy early education toys for their children but do not know which brand to choose. Then they have to mention the rising star "Mimi toys". Mimi's jigsaw tools not only Rich colors and shapes can also stimulate the babies' hands-on ability, make them fully exercise their hands-on ability and thinking ability during play, and better promote intellectual growth.

It is mainly a series of wooden puzzle toys. The product is positioned between 2 and 7 years old. Children under 14 years of age can also play. Children's alphanumeric cards. The main puzzles and literacy are in the form of small animal cartoons. They are cute and cute. The appearance and rich colors attract children ' s attention, and then use the wooden letters to let the children go to the letter and seat them. If you know the style of the letter, the next time you see the letter, you will actively call out the pinyin of the letter, and The writing method is printed on the back of each wooden letter. Babies can draw the shape of the letter by following the arrow instructions. This cultivates the baby's active awareness and saves many parents who do not know how to teach their baby to read. Letters in the form of words to play with friends, children like this form of play together, crowds of people, more exciting atmosphere to learn more than who spell more words, faster, babies also because of praise and Reward and work hard.

Babies can learn by playing, but there are some hidden dangers when playing.

The baby is young and stuffs everything into his mouth if there is a problem with the material of the toy. May harm baby. Taking these issues into consideration, the toys are made of healthy and environmentally-friendly materials, and healthy toys are made through craftsmanship, so that the baby can use them without worry. The material of the Robin board is selected. The surface of the toy made of this material is smooth and stable, and the performance is stable, and the debris will not fall and be eaten by mistake, which better protects the baby's health. The Robin board used in the toy The heating transfer technology not only has simple operation and exquisite printing skills, but also has strong adhesion and will not easily fade. The pieces can be used for a longer period of time and can accompany children for more years. The numbers and letters are colored with water-based paint, green and environmentally friendly. It's okay to bite. Mumei toys are all handmade, and each letter block has been smoothed and rounded to prevent sharp burrs from hurting the baby. The babies can use the toy happily while giving mothers more peace of mind.

Do n' t always think that your child is still young. This stage is a time to develop thinking and practical ability, so early education is particularly important. Choosing a good early education toy can not only greatly improve your baby ' s intelligence, but also cultivate your practical ability from a young age. good habits.
